ACC GUIDELINE ADDENDUM: CONCRETE EXTENSION

Addendum to ACC Guidelines: Concrete Driveway Extensions

In accordance with the Anatolia Community Committee (ACC) guidelines regarding concrete driveway extensions, the following addendum is hereby introduced to provide clarity and guidance:

1. **Compliance with City Regulations:** Concrete driveway extensions within Anatolia must adhere to the regulations established by the City, with specific limitations determined by individual lot sizes and zoning requirements. Extensions shall not exceed the maximum dimensions stipulated by the City, ensuring compliance with local ordinances, and maintaining community standards.
2. **Material Consistency:** The materials utilized for any concrete driveway extension must seamlessly match the existing concrete on the property. Consistency in material composition, color, texture, and finish is essential to maintain aesthetic harmony and visual cohesion throughout the community.

This addendum serves to augment the existing ACC guidelines, providing specific directives regarding concrete driveway extensions to promote uniformity, compliance, and aesthetic integrity within the Anatolia community.
